This Font Software End User License Agreement (“Agreement” or “EULA”) is a legally binding contract between you (“Licensee”) and Bloom Type Foundry AB (“Licensor”).

By downloading, installing, or using the font software (“Font”), you agree to be bound by this Agreement. If you do not agree to these terms, do not download, install, or use the Font.

Your invoice or purchase receipt (“License Certificate”) specifies the license(s) you have purchased and any applicable limitations, including but not limited to the number of users, domains, or monthly visitors.

1. Grant of License

Licensor grants Licensee a non-exclusive, non-transferable license to use the Font in accordance with the terms set forth in this Agreement and as specified in the License Certificate. Ownership of the Font is not transferred; this is a license to use, not a sale of intellectual property.

2. Intellectual Property Rights

The Font is the sole intellectual property of the Licensor. All rights, including but not limited to copyright, trademark, design, and other proprietary rights, are retained by Licensor. This Agreement does not confer any ownership rights upon the Licensee.

3. General Restrictions (Applicable to all license types)

Licensee may not:

- a. Resell, sublicense, distribute, or share the Font, except as explicitly allowed under Section 9.

- c. This license includes desktop use for up to ten (10) users exclusively for activities related to the licensed production or campaign. Additional users require separate Desktop Licenses.

7. Application / Game License

Embedding the Font in software applications (mobile, desktop) or video games requires a specific Application / Game License. No other license type permits this use. Contact Licensor to obtain such a license.

8. Server / SaaS License

If a Server / SaaS License has been purchased, Licensee may:

- a. Install the Font on a server to facilitate the automated or programmatic generation of digital or physical products (e.g., personalized PDFs, invoices, or customized merchandise) for third parties.

This license is restricted to the number of server instances, processing cores, or specific application titles as defined in the License Certificate.
